9/15 System Administrator Launches Administration Application 902 System Administrator Uses Admin.

System Administrator Uses Admin. App. to Request List of Devices Available On One Or More Fabric Ports 904

Admin. App. Makes Call to Library Interface To Obtain List 906

Library Calls FCP Module To Obtain List 908

FCP Module Calls Port Driver Module(s) For Port(s) For Which Request Made 910

Port Driver Module(s) Query Fabric Name Server To Obtain Device Information And Then Return The Information To FCP Module 912

FCP Module Selects SCSI Devices And Returns List Of SCSI Devices To Library 914

Library Passes List To Admin. App. 916

Admin. App. Displays List To System Administrator <u>918</u> System Administrator Chooses Subset Of Devices From List To Be Onlined 932

Admin. App. Calls FCP Module (via library) To Online The Selected Devices 934

FCP Attempts To Online (using port driver services) Each Selected Device And Reports Successful Online To Library 936

Library Updates Persistent Repository To Reflect Currently Onlined Devices 938
